# Combined Graduate level Examination 2023 Tier I

Roll Number	2409005799
Candidate Name	ABHISHEK KUMAR
Venue Name	iON Digital Zone iDZ Dholi Magri
Exam Date	19/07/2023
Exam Time	11:45 AM - 12:45 PM
Subject	Combined Graduate Level Examination Tier I 2023

Section: General Intelligence and Reasoning

Q.1 Select the option that is related to the fifth letter-cluster in the same way as the second letter-cluster is related to the first letter-cluster and the fourth letter-cluster is related to the third letter-cluster.

CROWN: OYRVH:: TABLE: FNEEY:: UNREAL:?

Ans X 1. NDHVSA

2. MCHVSA

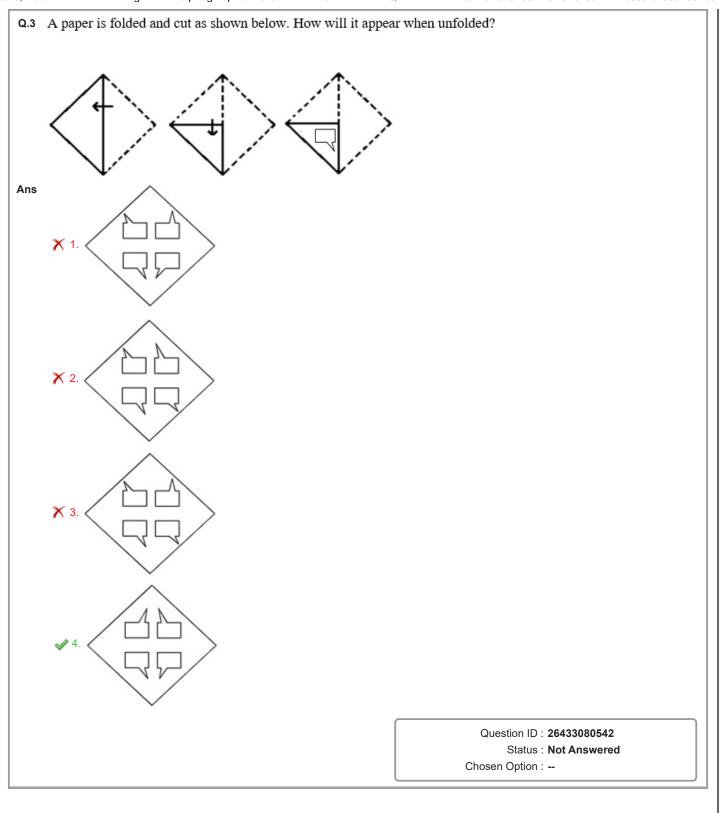

X 3. NCHUSB

X 4. LAERNU

Question ID : 26433090021 Status : Answered

9/30/23, 1:50 PM Q.2 Select the figure from among the given options that can replace the question mark (?) in the following series. Ans

> Question ID: 26433087147 Status : Answered

ssc.digialm.com//per/g27/pub/2207/touchstone/AssessmentQPHTMLMode1//2207O23185/2207O23185S22D98832/1695708235... Q.4 Select the set in which the numbers are related in the same way as are the numbers of the following sets. (NOTE: Operations should be performed on the whole numbers, without breaking down the numbers into its constituent digits. E.g. 13 - Operations on 13 such as adding /Subtracting /multiplying etc. to 13 can be performed. Breaking down 13 into 1 and 3 and then performing mathematical operations on 1 and 3 is not allowed) (100, 2, 150) (50, 5, 240) **Ans** X 1. (10, 8, 98) **X** 2. (14, 16, 8) **3**. (16, 8, 126) **X** 4. (10, 5, 200) Question ID: 26433089592 Status: Answered Chosen Option: 3 Q.5 Select the option that represents the letters that, when placed from left to right in the following blanks, will complete the letter-series. REU\_TR\_\_QTREW\_\_RE\_\_T Ans X 1. QFVQTXR 2. Q F W Q T X Q X 4. Q E W Q T Y R Question ID: 264330143749 Status: Answered Chosen Option: 3 Q.6 In a certain code language, 'MARS" is coded as "51" and 'STARS" is coded as "77". How will 'MOON' be coded in that language? X 1. 54 X 2.56 **3**. 57 **X** 4. 55 Question ID: 264330132100 Status: Answered Chosen Option: 3 Q.7 A + B' का अर्थ है 'A, B की बहन है'।
'A - B' का अर्थ है 'A, B की पत्नी है'।
'A × B' का अर्थ है 'A, B का भाई हैं। 'A ÷ B' का अर्थ है 'A, B का पिता है'। यदि L + M + N – O ÷ P × Q है, तो निम्नलिखित में से कौन-सा कथन सही नहीं है? Ans \chi 1. 0, Q का पिता है। 🗶 2. P, N का पुत्र है। 🗙 4. M, O की पत्नी की बहन है।

> Question ID: 264330122048 Status: Answered

Q.8 सूरज की तस्वीर की ओर देखते हुए गौरव ने कहा, "यह मेरे दादा के इकलौते पुत्र का पुत्र है।" तस्वीर में दिंख रहे लड़के, सूरज से गौरव किस प्रकार संबंधित है?

Ans \chi 1. पिता

🗶 २. पोता

🗶 3. चचेरा भाई

**ൾ** 4. भाई

Question ID: 26433092748

In the following passage, some words have been deleted. Read the passage carefully and select the most appropriate option to fill in each blank.

The cornea, a transparent covering, and a spherical lens make up the eye's lens system, just like any other camera. The retina is a kind of 'reusable film'. This is the (1)\_\_\_\_\_ for images. The size of the opening, the shape of the lens and the movements of the eye are all controlled by various sets of muscles.

There are three things that happen when you look at an object:

- 1. To fit on the retina, your eye's tiny 'screen', the image must be reduced in size.
- 2. It is necessary to focus the scattered light at the retina's (2) \_\_\_\_\_.
- 3. To match the retina's curve, the image must be curved.

The image is focused on the retina by the lens and cornea working (3) \_\_\_\_\_\_. When the eye is unable to focus the image onto the retina, the majority of vision problems occur. The cornea is reshaped during laser eye surgery, which alters the eye's focal point. The primary objective is to precisely focus the image on the retina, just like in an ordinary eye. The corneas of most people are either too long or too short. In the first scenario, corneal flattening is accomplished through laser eye surgery. The cornea is reshaped in the latter scenario by becoming rounder. This corneal tissue is amazing because it heals and rebonds immediately, (4) \_\_\_\_\_\_ the need for stitches.

To make precise cuts as (5) \_\_\_\_\_ as a quarter micron in length, a laser beam is sharply focused. A laser can remove 0.5% of a human hair's width at once, and the typical human hair has a diameter of fifty microns! Although they are able to significantly improve their vision, many laser eye surgery patients never attain normal vision.

In the following passage, some words have been deleted. Read the passage carefully and select the most appropriate option to fill in each blank.

The cornea, a transparent covering, and a spherical lens make up the eye's lens system, just like any other camera. The retina is a kind of 'reusable film'. This is the (1)\_\_\_\_\_ for images. The size of the opening, the shape of the lens and the movements of the eye are all controlled by various sets of muscles.

There are three things that happen when you look at an object:

- 1. To fit on the retina, your eye's tiny 'screen', the image must be reduced in size.
- 2. It is necessary to focus the scattered light at the retina's (2) \_\_\_\_\_.
- 3. To match the retina's curve, the image must be curved.

The image is focused on the retina by the lens and cornea working (3) \_\_\_\_\_\_. When the eye is unable to focus the image onto the retina, the majority of vision problems occur. The cornea is reshaped during laser eye surgery, which alters the eye's focal point. The primary objective is to precisely focus the image on the retina, just like in an ordinary eye. The corneas of most people are either too long or too short. In the first scenario, corneal flattening is accomplished through laser eye surgery. The cornea is reshaped in the latter scenario by becoming rounder. This corneal tissue is amazing because it heals and rebonds immediately, (4) \_\_\_\_\_\_ the need for stitches.

To make precise cuts as (5) \_\_\_\_\_ as a quarter micron in length, a laser beam is sharply focused. A laser can remove 0.5% of a human hair's width at once, and the typical human hair has a diameter of fifty microns! Although they are able to significantly improve their vision, many laser eye surgery patients never attain normal vision.

### SubQuestion No: 25

Q.25 Select the most appropriate option to fill in blank no. 5.

Ans

X 1. high

X 2. big

X 3. large

4. small
